

LK04-1002 All Plastic Front Portable Restroom Door Lock Kit

General Overview

The LK04 -1002 Door Lock Kit - is designed to be used with most portable restrooms constructed of all plastic. This kit can be mounted anywhere along the non-hinged side of the door and door jamb. The hasps are made from stainless steel and the rivets are aluminum, assuring a no rust, maintenance free long life.

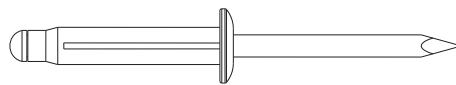

The recommended padlock is the PC-000205M sold separately.

Lock Installation

One person can install this kit quite easily. It is suggested to install the kit just below the door pull (as shown below on the PJN3).

Install the crescent plate hasp first.

Step 1. Using the three-holes of the crescent plate hasp as a drill guide, position the plate on the outer lip on the edge of the door, making sure the flat edge is held tight to the door lip.

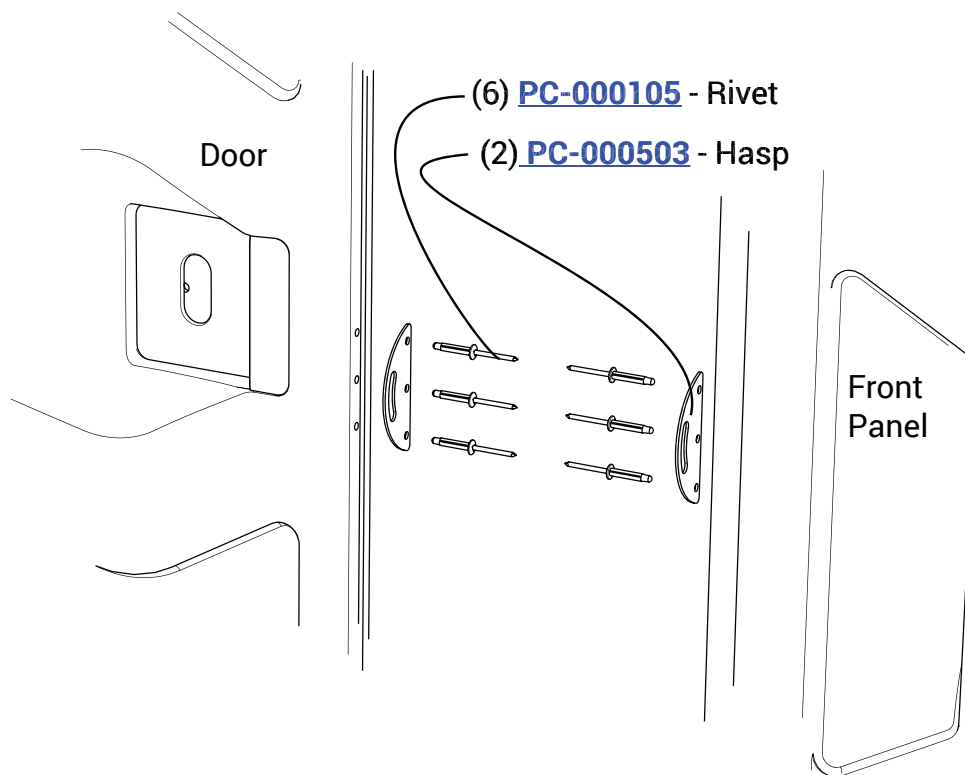

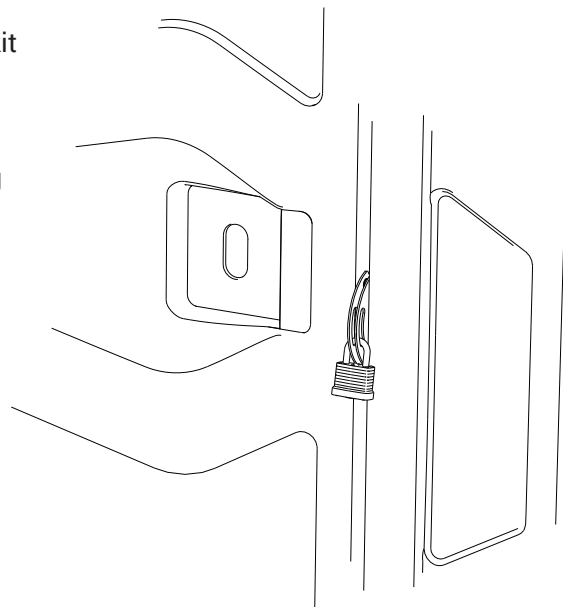

Step 2. Drill three 13/64" holes into the first wall of the door.

Step 3. Rivet in place using (3) PC-000105 rivets.

Step 4. Now, align the other crescent plate hasp on the edge of the front panel so that the slots of both hasps are aligned..

Step 5. Using the holes of the hasp as a drill guide, drill three 13/64" holes into the front panel.

Step 6. Rivet in place using (3) PC-000105 rivets.
