

# PSD1-1000 HAND SANITIZER/ SOAP DISPENSER MODIFICATION INSTRUCTIONS

## GENERAL OVERVIEW

In January 2021, a change was made to the soap dispenser container and backing plate. The change involved adding a rib to the underside of the hook that holds the container onto the mounting plate. A groove was added to the mounting plate for clearance. This means that any mounting plate prior to the change will either have to be replaced with a new model or modified if replacing the soap dispenser container. These instructions will guide you through the process of making the modification to the mounting plate so that it will work with the updated soap dispenser container.

Capacity: 30oz / 887ml

We recommend reading through the entire information booklet prior to proceeding with installation, service and maintenance. All references to left and right throughout the booklet are as viewed from the front of the restroom.

## TOOLS REQUIRED

- Drill
- 5/32" Drill Bit

## INSTRUCTIONS

Drill a 5/32" hole just below the horizontal surface in the direct center of the part. Be sure to drill only through the mounting plate.

After drilling the hole, run the drill bit up to make the slot

Your new soap dispenser container should now fit your existing mounting plate.
